First Nevada Assisted Living Community to Offer  
Puradigm Air Technology

Air quality is important to all Nevada residents. Inspirations Senior Living has taken the extra step to ensure the best for its resident by installing Puradigm Air Technology throughout the entire community which will improve air quality for residents, staff, and those visiting the community. Inspirations Senior Living is the first assisted living community in Nevada to offer this air technology system.

*"We are very excited to offer our residents the best in air technology. By utilizing the Puradigm system we will be improving air quality, reducing odors, and sanitizing surfaces throughout Inspirations, making our home the best place to be" said Paul Ortega, Executive Director of Inspirations. "We encourage anyone with questions to please come visit to receive more information."*

Puradigm Air Technology provides an enhanced ionization output, representing the newest generation of proactive air purification. Puradigm effectively destroys mold, mildew, bacteria, viruses, odors, volatile organic compounds (VOCs), and the odors associated with them at their source, in the air and on surfaces.

## FEATURES & BENEFITS

- Reduces contaminants such as mold, bacteria and viruses in the air and on surfaces within the community.
- Helps eliminate odors at the source - doesn't just cover them up
- Provides a fresh indoor environment, even when windows are closed for energy efficiency
